

**LONG TERM CARE SURVEY**

SURVEY AREA	OBSERVATION	INTERVIEWING	RECORD REVIEW	EVALUATION FACTORS	CROSS REFERENCE
Tracheostomy Care F133 (cont'd)			since this may require additional care planning.		
Suctioning F133 SNF 405.1124(c)	<p>Suctioning is necessary for any resident who is unable to cough up secretions that are obstructing his airway. Suctioning may occur via the oral or nasal route, or stoma route with sterile technique. Attempts should be made to observe a resident being suctioned should such an opportunity arise. If so, observe that a clean/aseptic technique is observed throughout and that the resident tolerated the procedure. There should not be bloody aspirant, cyanosis, or bronchospasm. Check that equipment is in good working order, frequency of procedure, etc.</p> <p>Resident observations which indicate need for intervention include:</p> <ul style="list-style-type: none"> <li>- Secretions are draining from a resident's mouth or trach and the resident is unable to</li> </ul>	<p><b>Ask Resident:</b></p> <ul style="list-style-type: none"> <li>- How are you feeling now after the suctioning? Does the suctioning seem to help?</li> <li>- Has staff explained to you the need for suctioning? Why do you need to be suctioned? How often?</li> <li>- Who performs the suctioning (i.e., nurses or nurses aides)? Do you feel safe with the staff performing the suctioning?</li> <li>- Does everyone do it about the same way?</li> </ul> <p><b>Ask Staff:</b></p> <ul style="list-style-type: none"> <li>- When and where did you learn to suction?</li> <li>- Tell me what procedure you use when you suction a resident.</li> <li>- Do you always have enough suction machines and catheters?</li> <li>- How frequently is suction tubing changed?</li> <li>- What provisions do you have for suctioning if the electricity is lost?</li> </ul>	<p>- Assessment - The record should reflect that:</p> <ul style="list-style-type: none"> <li>+ The resident is frequently observed for suctioning needs.</li> <li>+ Any limitations a resident has as a result of his suctioning needs should be specifically noted.</li> <li>+ Any problems resulting must be specified.</li> </ul> <p>- Plan of Care should include:</p> <ul style="list-style-type: none"> <li>+ Awareness of the resident's suctioning needs, goals, approaches, and responsible staff needed to improve the problem or at least to maintain the resident at his present status without further deterioration.</li> </ul> <p>The plan must clearly indicate specific approaches towards:</p> <ul style="list-style-type: none"> <li>- Prevention of skin problems around the trach if one exists.</li> <li>- Correction of any existing skin pro-</li> </ul>	<p>- All equipment must be available and in working order.</p> <p>- All staff caring for the resident must know what to do in an emergency.</p> <p>- Current professionally accepted standards of care must be maintained.</p>	<p><b>Infection Control</b> 405.1135(b)</p> <p><b>Patient Care Management</b> 405.1124(d)</p>
